

FinTrust Digital Bank — Data Cleaning Log

Project Deliverable: Data Quality & Remediation Report

Responsible Person: Vincent Peace Ofure

Track: Data Analytics Week 2

Data Source	Field/Column Name	Type of Issue	Description of Issue	Cleaning Action Taken	Tool/Method Used	Responsible Person	Remarks
FINTRUST CUSTOMER DATA	Is_Active_Member	Textual Boolean	Stored as 'Yes' and 'No' text instead of binary flags	Converted 'Yes' to '1' and 'No' to '0'	SQL UPDATE with CASE statement	Peace	Standardized values before converting data types
FINTRUST CUSTOMER DATA	Has_Credit_Card	Textual Boolean	Stored as 'Yes' and 'No' text instead of binary flags	Converted 'Yes' to '1' and 'No' to '0'	SQL UPDATE with CASE statement	Peace	Standardized values before converting data types
FINTRUST CUSTOMER DATA	Churn_Risk_Flag	Textual Boolean	Stored as 'Yes' and 'No' text instead of binary flags	Converted 'Yes' to '1' and 'No' to '0'	SQL UPDATE with CASE statement	Peace	Standardized values before converting data types
FINTRUST CUSTOMER DATA	International_Transaction	Textual Boolean	Stored as 'Yes' and 'No' text instead of binary flags	Converted 'Yes' to '1' and 'No' to '0'	SQL UPDATE with CASE statement	Peace	Standardized values before converting data types

Data Source	Field/Column Name	Type of Issue	Description of Issue	Cleaning Action Taken	Tool/Method Used	Responsible Person	Remarks
FINTRUST CUSTOMER DATA	Risk_Review_Flag	Textual Boolean & Data Type Mismatch	Stored as 'Yes'/'No' text instead of BIT data type	Converted text to '1'/'0' and altered column data type to BIT	SQL UPDATE and ALTER TABLE ... ALTER COLUMN	Peace	Prepared column for flag-based filtering
FINTRUST CUSTOMER DATA	Amount_NGN	Data Type Mismatch	Stored as nvarchar text string	Altered column data type from text to FLOAT	SQL ALTER TABLE ... ALTER COLUMN	Peace	Enables numerical aggregations (SUM, AVG)
FINTRUST CUSTOMER DATA	Digital_Engagement_Score	Data Type Mismatch	Stored as nvarchar text string	Altered column data type from text to FLOAT	SQL ALTER TABLE ... ALTER COLUMN	Peace	Enables numerical scoring and grouping
FINTRUST CUSTOMER DATA	Transaction_DateTime	Data Type Mismatch	Stored as nvarchar text string	Converted column data type to DATETIME2	SQL ALTER TABLE ... ALTER COLUMN	Peace	Enables precise time-series and date calculations
FINTRUST TRANSACTION DATA	Customer_ID	Schema & Redundancy Check	Checked table necessity and primary key alignment	Verified all transactional records exist inside FINTRUST CUSTOMER DATA	SQL INFORMATION_SCHEMA query	Peace	Confirmed schema structure and avoided unnecessary duplicate table cleaning
